Feb 17, 2017 I bought rainbow six siege a few months back but I didn't have a good enough computer for it.. I was able to run it but it only had 17 fps on the lowest settings so it was technically impossible to play it.. The player needs to make a game-strategy to beat the other team, and get along with the other mates.. There are weapons that can be bought during the play, and some gear and gadgets that can be customized.. The only question is, can you run the game on a Mac? Also forgot to mention im not buying the macbook pro im.. The rest is about using the teamwork, war tactics and getting along with team-mates..
